### ***DETAILED ACTION***

Claims 1-27 are pending in this application. Claims 8-15 and 17-21 and 23-27 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

## Information Disclosure Statement

Applicant's Information Disclosure Statements, filed on 27 February 2004 and 28 July 2004 have been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

**Priority**

Applicant's claim of the benefit of U.S. Provisional Application No. 60/487,510 filed 15 July 2003 and GERMANY 10308355.3 filed 27 February 2003.

### *Response to Restriction*

Applicants' election with traverse of Group I, claims 1-7, 16 and 24-26( all claims in

part), drawn to a product of Formula

, and the

specific compound of Example 50,

in response filed 25

Art Unit: 1626

September 2006 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Therefore, the restriction requirement is deemed proper. In accordance with M.P.E.P. 821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims and method of preparation commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until such time, a restriction between product claims and process is deemed proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

*The scope of the elected subject matter and expansion of search of within the same patent classification as elected invention is as follows:*

Compounds of formula I,

,depicted in

claim 1, wherein: W is C; ring A is any C3-C8 carbocyclic group; R1-R14 are as defined except that they don't represent a heterocyclic group; X is O or S; n is 0-2.defined;

As result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-7, 16 and 24-26are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The

Art Unit: 1626

withdrawn compounds contain varying functional groups such as pyridine, homopiperazinyl, thiomorpholinyl, etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 63(+) (thiomorpholine), class 546 subclass 249(+) (pyridinyl), class 544 subclass 180(+) (triazines), etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

### ***Objection***

Claims 1-7, 16 and 22 are objected to for contain non-elected subject matter.
